# ACCU-DART is the Ideal Inventory Management Solution!

ACCU-DART is a real-time warehouse and inventory management solution, designed to integrate directly with Sage Pro ERP. It is easy to install and easy to use. Using radio-frequency scanners, it allows the warehouse staff to instantly update the accounting system, ensuring that all users throughout the organization have the most up-to-date information. ACCU-DART will:

- **Improve Accuracy of Shipping:** Ship the *right* goods to the *right* customer - the first time

- **Increase Efficiency:** Reduce manual data entry

- **Enhance Productivity:** Minimize inventory dollars – Maximize sale

- **Increase Customer Service & Satisfaction**

> *"Executive Concepts Inc. has enabled our distribution centre to become totally wireless by delivering ACCU-DART's Radio Frequency application that allows our staff to do their jobs more effectively."*
>
> - Dan McArthur, CFO and COO
> CanSave

ACCU-DART has been designed to integrate with accounting/inventory control systems. All inquiries and updating occur against the existing system. Having a single source of data eliminates synchronization and reconciliation issues. Functions can be performed using ACCU-DART or by using the regular accounting system. The same updates are performed in either case.

Posting happens in *real-time.* No data synchronization or additional steps are required!
