Introducing ACCU-DART Mobile
What Sets us Apart from the Competition

Event Reporter: Sage Summit

The Sage Summit conference in New Orleans was a great success! It was wonderful to connect with so many of our resellers, as well as meet some new faces. This was a great opportunity for us to demonstrate all the ACCU-DART developments we have been working on this past year - including our parallel processing, new hardware options, and our soon-to-be-released version of ACCU-DART for Sage ERP X3.

We were also very pleased by the great turnout of end-users, who got a unique opportunity to meet the ACCU-DART team and learn about the great third-party products that are available.

Thank you to everyone who stopped by to say "hello" and learn more about how ACCU-DART can benefit both your and your clients' business!

Introducing ACCU-DART Mobile

In our continued effort to utilize the latest technological advancements to give more choices to our customers, we are thrilled to introduce the NEW ACCU-DART Mobile: compatible with Apple Devices (iPod, iPad, and iPhone), Windows Mobile, and Android devices.

Users benefit from the same great ACCU-DART features: real-time validation and updating, and direct integration with the ERP solution. Save time, effort, and improve inventory accuracy with one great solution!

Our NEW ACCU-DART Mobile app offers many advantages:
Easy to Use: ACCU-DART Mobile incorporates touch-screen selection that is already intuitive for many iPhone, Windows Moble, and Android users. Our new navigation icons make it easy for users in any language to use our product.

Flexibility: Communicate directly with the ERP solution from anywhere in the world where they have internet access - the devices use either wifi or cellular connections to integrate directly with the ERP system. Mobile devices also make it easy to run multiple apps in the warehouse, allowing users to have all their business applications at their fingertips.

ACCU-DART for Windows Mobile
Our established Windows Mobile application has received a significant upgrade, incorporating touch-screen capabilities and our new navigation icons to make the system even more intuitive and easy-to-use.

With ACCU-DART for Windows Mobile, you have the freedom to choose the best hardware solutions to suit your business. There are virtually limitless options to choose from. From Zebra radio-frequency scanners to cellular devices, ACCU-DART for Windows Mobile will help you keep control of your inventory regardless of your specific business needs.

ACCU-DART for iPod and iPhones
The ability to use Apple devices in the warehouse opens a world of possibilities for businesses. While

these units may not appear to be rugged enough for typical warehouse environments, adding a rugged case and a barcode scanner make this an easy-to-use, affordable solution for many businesses.

We suggest the iPC Linea Pro 6 - a rugged iPhone/iPod case that features an integrated 1D/2D scanner. "This fully ruggedized version of [their] iPhone/iPod platform stands up to the rigors of demanding environments like warehousing and field services. Compatible with the iPhone 5 or iPod Touch 5. For more information, visit www.ipcprint.com

ACCU-DART for Android Devices - coming soon!

We are currently in development for ACCU-DART for Android devices. Expect to see the same great features as our Windows Mobile, and Apple devices.

ACCU-DART Mobile offers the greatest value and flexibility for our customers. To learn more about how ACCU-DART can benefit your business, please visit www.accu-dart.com

What Sets us Apart from the Competition

Discover the ACCU-DART Advantage:
- Our years of experience help us to provide the best solutions for our clients. We have been providing inventory management solutions since 1991
- We value our relationship with our resellers
  - While our expertise is inventory control, our resellers expertise is understanding their client's business
  - We always communicate via our resellers to allow them to keep control of the project(s).
- Constantly working to improve our proven product:
  - NEW hardware options including Apple/iOs devices
  - Parallel processing to increase speed and reduce lag
  - Integration with new ERP platforms including Sage ERP X3 and Acumatica

Please feel free to contact us at info@accu-dart.com to learn more about the ACCU-DART advantage for your clients!
