ACCU-DART Announces NEW Monthly Plan Option!

An affordable alternative for clients in need of inventory control

The ACCU-DART team understands the importance of offering an affordable inventory management solution for your clients. As such, we are incredibly excited to announce a new monthly plan option for your clients.

While we believe ACCU-DART's modularity and competitive pricing make it an affordable solution, we understand that for many clients it is difficult to invest a single sum upfront. For this reason, we have created an easy monthly plan option. Clients can now pay a monthly fee for the software, significantly reducing the initial investment and making it easy to implement and afford. This monthly fee includes their software assurance, entitling the user to free updates and upgrades, technical support and more. The hardware will need to be purchased. Clients will also have the option to buy the software license at a later date - earning a rebate % each month towards the purchase.

For Example: A client who needs 3 RF users, Ship Sales Orders, PO Receipts, and Physical Count would pay less than \$400 per month for the software!

You now have the choice of offering your clients the traditional software pricing or the new monthly plan. Resellers: you will still receive your reseller discount, which for the monthly plan will be issued to you on a regular basis.

The ACCU-DART Monthly Plan payment option will help make ACCU-DART affordable for any client who needs to get control of their inventory.

For more information, please click here or contact us at info@accu-dart.com.

Upcoming Events: TPAC

We are very excited to be participating in the 2009 Third-Party Advantage Conference (TPAC) August 20

- September 1, 2009 in Vancouver, BC. TPAC

"is the conference that showcases third-party products that work with Sage Accpac ERP and Sage CRM. Every product

shown is potentially useful for you in providing a solution to your clients and prospects".

We will be exhibiting at Booth #15, so please come by and meet our team, or attend one of our informative sessions to learn more about ACCU-DART:

Session #1 - How to Demo and Sell ACCU-DART to your Prospects

This session will explore how to position ACCU-DART as the best inventory control solution for your clients and prospects, and how to demo the product simply and easily.

Session #2 - Installing and Using ACCU-DART with Q & A

In this session, join us to see how to easily install and operate ACCU-DART, and to answer any specific questions you may have about our product. You will also receive a FREE trial version of the software to install on your laptop computers.

For more information about TPAC, please visit www.tpac.biz

Introducing Bin Tracking for Sage Accpac

Bin Tracking functionality allows you to track specific

STAY CONNECTED
TO YOUR INVENTORY

inventory information, and know where items are located at all times. By incorporating radio-frequency bar code scanning, the warehouse staff can instantly update the system as they handle each item in real time. ACCU-DART is proud to offer integration with the Bin Tracking solution from Orchid Systems.

Seamless Integration - ACCU-DART updates inventory and bin information directly to Orchid Systems software and with Sage Accpac. There is no additional database to maintain and reconcile.

Essential Real Time Updating - Tracking Bin information in real-time is essential to make the most of this crucial data.

The old way: Moving goods from one bin to another, but only updating the database every few hours (or at the end of the day) leads to inaccurate and out-of-date information, that is not as meaningful to your business

The ACCU-DART way: By easily scanning bin information with each transaction through ACCU-DART and Orchid Systems Bin Tracking software, you will have the most up-to-date information on your inventory at all times.

Extensive Functionality - Orchid Systems and ACCU-DART have developed numerous modules to meet your bin tracking needs. It is also easy to add bin tracking to your existing ACCU-DART installation. Modules include:

Ship Sales Orders with Bins, Receive Purchase Orders with Bins, Physical Count with Bins, Bin Transfers, Picking, Put Aways, Pick by SO, and more...

ACCU-DART's ability to record bin information - in addition to the standard Sage Accpac data - and to update the database in real-time from the warehouse floor, provides a cost-effective realistic solution to tracking crucial bin information.

*Users must purchase Bin Tracking from Orchid Systems.

Bin Tracking Integration available Summer 2009

Why Invest in ACCU-DART Now?

In tough economic times, many businesses are cutting back costs in an attempt to stay afloat. However, there is no greater time to invest in solutions that enhance productivity than when you're trying to save costs.

At first it may appear counter-intuitive to invest in a new

system while trying to cut back on expenses, but by improving efficiencies, your clients can save countless dollars in labor costs, shipping expenses, customer service salaries, and much more.

With a relatively small initial investment, or by taking advantage of our new monthly plan option, your clients can reap the long-term benefits and gain profitability.

With ACCU-DART, your clients' business will:

Save Manpower - implementing ACCU-DART can have substantial impact on reducing clerical effort and thereby freeing up staff to do other important jobs around the organization. For example: receiving purchase orders with ACCUDART will eliminate the need to have someone collect all the paperwork, go to the receiving screen in the accounting system, and manually input what has been received. When using ACCU-DART, the information is updated in real-time, saving you hours of manpower.

Reduce Shipping Errors - Shipping the wrong goods to a customer can have a major impact on your clients' bottom line. They will waste money dealing with irate customer phone calls, waste labor time handling the return and re-shipment of the correct order, lose money on the additional freight costs, and possibly miss out on future sales opportunities by having inaccurate inventory values. By shipping the right goods the first time with ACCU-DART, your clients may save these unnecessary costs.

Improved Inventory Accuracy - ACCU-DART can help improve inventory accuracy which will then allow your clients to make better-informed decisions on issues like: satisfying order requests, planning purchases, and reducing inventory levels. Accurate and timely inventory is the key to maximizing inventory dollars.

We at ACCU-DART understand how difficult it can be to invest in any system during these trying times. For this reason, we are proud to offer a new monthly plan option. Clients can now pay a monthly fee for the software, significantly reducing the initial expenses. With the monthly plan option, it has never been a better time to invest in ACCU-DART.

When economic times are tough many companies are struggling to stay afloat. By investing in solutions that will improve their overall operations, your clients will not only survive the hardships, but become more profitable in the long-run.
