

## AccountMate Synergy Conference - February 2005

ACCU-DART was exhibited at the AccountMate Conference in San Rafael, California February 6-9, 2005. The conference was a wonderful opportunity to connect with other Business Partners and learn about other available Vertical Solutions. As always, the management and staff at AccountMate impressed us and we are looking forward to a long and happy relationship shared between AccountMate and ACCU-DART.

ACCU-DART was the recipient of AccountMate's 2005 Vertical Solution Partner Outstanding Partnering Award. "The Outstanding Partnering Award is more than just sales of a vertical product that has helped to sell AccountMate Software. It is a working relationship with AccountMate that adds value across the organization and the Business Partner channel." It was an honor to be recognized for ACCU-DART's achievements.

## ACCU-DART Resellers make *Accounting Technology's* VAR 100

Congratulations to ACCU-DART Resellers Net@Work, Mibar Computer Services, and Harwood Consulting for ranking in *Accounting Technology's* VAR 100 for 2005. *Accounting Technology* ranks the top selling accounting resellers of the year to recognize outstanding sales in the accounting software industry. ## Best Software Insights 2005 - May 2005

We are very excited to be exhibiting ACCU-DART at the Best Software Conference and Trade Show in Dallas, Texas from May 17 - May 19, 2005. Visitors can stop by our booth #2213 to see a demo of ACCU-DART, pick up feature sheets, or read a case study. Come and see how ACCU-DART can revolutionize your client's business.

ACCU-DART automates most of the daily warehouse functions. Warehouse staff use radio frequency terminals to immediately update the accounting system. Data is validated to ensure the right goods are being handled in the right quantities for all operations.

ACCU-DART is designed to fully integrate with your existing accounting and inventory system. The seamless, real-time updating of your accounting and inventory data ensures that data integrity is maintained and your data is accurate at all times.

Take this opportunity to see ACCU-DART in action and to discuss how ACCU-DART can help you help your customers. ACCU-DART is easy to implement and easy on the budget.

## Preview of the Next Release

What is going to be new with ACCU-DART? The next release will be multi-lingual, with the ability to specify the preferred language by R/F user. The Desktop version will not only support multi-lingual, it will allow for playing .wav files at each prompt. Stay tuned for more exciting news from ACCU-DART!

## Announcing a Proud Addition to the ACCPAC Family!

### ACCPAC Advantage Series

The ACCPAC family just got a little bigger - and better. Executive Concepts is pleased to announce the upcoming release of ACCU-DART for ACCPAC Advantage Series® (AAS). At the annual Best Software Conference, Insights 2005, we will be demonstrating the newest addition to the ACCU-DART family at the beautiful Gaylord Texan Resort in Grapevine, Texas, from May 17-20, 2005, Booth 2213

Working together on a radio frequency/bar code system, ACCU-DART for ACCPAC Advantage Series® ties together everything from receiving purchase orders and transferring stock to physical counts and shipping, billing, and restocking.

Already available for the ACCPAC Pro Series® line of applications and warehouse functions, ACCU-DART for ACCPAC Advantage Series® will provide AAS dealers and consultants new opportunities to help emerging and mid-market businesses optimize for their warehouse productivity and meet their logistical challenges today and in the future.

ACCPAC Pro Series® and ACCPAC Advantage Series® dealers and consultants - stop by our booth 2213 at Best Software's Insights 2005 and let us demonstrate the power, ease of use, and flexibility of the wireless radio ACCU-DART solution to you. We'll see you at Insights 2005 in Texas in May!

### Featured Function: Master Bin Replenishment

Master Bin Replenishment is an extremely valuable function for optimizing warehouse operations. ACCU-DART determines which bins in the warehouse need to be restocked and in order to maximize pick and ship efficiencies. It can be a time consuming and disruptive to have to search for goods in the warehouse in the middle of a shipment. ACCU-DART helps

ensure that you will have the right stock available exactly where and when you need it.

Master Bin Replenishment makes use of AccountMate's primary bin feature, in which users can identify the main bin for picking and shipping goods, as well as stock bins. Users sets the refill point and refill quantity. Based on these fields and the current inventory position, ACCU-DART knows when goods are below the minimum stock level. ACCU-DART will simply indicate on handheld device what needs to be restocked from where.

For maximum benefit, Master Bin Replenishment would become a regular function in your warehouse to ensure that sufficient stock is available for the operations. The realtime nature of ACCU-DART ensures that it is providing accurate replenishment data all day. One or more warehouse staff can easily check to see if anything needs to be replenished.

Please contact us for more information about Master Bin Replenishment for ACCU-DART for AccountMate.

### Joke of the Month

A programmer has been missing from work over a week when finally someone noticed and called the cops. They went 'round his house and broke the door down. They found him dead in the still running shower with an empty bottle of shampoo next to his body. Apparently he'd been washing his hair.

The instructions on the bottle said:

- Wet Hair
- Apply Shampoo
- Wait 2 minutes
- Rinse
- Repeat
